

JANE GOODALL'S WILD CHIMPANZEES

Quick Facts

Film Title:	<i>Jane Goodall's Wild Chimpanzees</i>
Producers:	Science Museum of Minnesota; Science North, Sudbury, Ontario; Discovery Place Inc., Charlotte, North Carolina
Presenting Sponsor:	Bank of America
Major funding provided by:	National Science Foundation
Distributor:	Science Museum of Minnesota
Format:	Filmed in 15-perforation/70mm
Film description:	Viewers will be immersed in the forest environment of Gombe Stream National Park in Tanzania as they accompany world-renowned wildlife biologist Jane Goodall on her treks to observe chimpanzees in the wild. They'll meet Goodall's now-famous chimpanzee subjects and get an up-close look at them as they hunt, play, and communicate with one another. They'll see archival footage of Dr. Goodall in her early years at Gombe, and they'll watch as Goodall's relationship evolves from one of strictly scientific interest to one of devotion and a firm commitment to chimpanzee survival. And they'll meet the next generation of researchers at Gombe, whose mission it is to carry on Dr. Goodall's legendary work.
World Premiere:	October 2, 2002, at Discovery Place, Charlotte, NC
Length:	42 minutes
Director:	Dave Lickley, Sudbury Science Films
Executive Producers:	Mike Day, Jim Marchbank, Freda Nicholson
Director of Photography:	Reed Smoot
Writer:	Stephen Low
Music:	Johnny Clegg
